

Sehr geehrter Motorradfreund,

mit diesem Katalog bieten wir Ihnen Komplettsätze für Motorrad-Lenkkopflagerung sowie Radlager an.

Die Umbausätze für die Lenkkopflagerung bestehen jeweils aus zwei Kegelrollenlagern, oberer und unterer Dichtscheibe, Passscheiben zum Ausgleich der Bauhöhe, spez. Wälzlagerfett, sowie einer ausführlichen Montageanleitung. Der Umbausatz kann ohne Änderungen am Motorrad gegen die serienmäßigen Lenkkopflager ausgetauscht werden. Die Maßangaben der Lager in der Liste (Innendurchmesser x Außendurchmesser x Lagerhöhe in Millimetern) dienen der Information. Für Aprilia, Benelli, Ducati, MV, Moto Guzzi sowie einige Kawasaki Modelle bieten wir in dieser Liste zusätzlich die serienmäßigen Schrägkugellager an. Sämtliche von uns angebotenen Lager liefern wir in Erstausrüsterqualität.

Zur Bestellung senden Sie uns bitte eine Mail mit Ihrer Rechnungsadresse / Versandadresse und geben die Artikelnummer an. Sie erhalten von uns eine Auftragsbestätigung mit den Versandkosten bzw. Gesamtkosten. Mit der Lieferung erhalten Sie eine Rechnung mit ausgewiesener MwSt.

Preisliste Stand 1. März 2014.

Die Preise in der Liste sind in Euro angegeben und enthalten die zur Zeit gültige Mehrwertsteuer.

Die Preise beziehen sich auf den kompletten Umbausatz. Bei Schrägkugellagern auf den Umbausatz ohne Dichtscheiben.

Vorteile der Lenkkopflagerung mit Kegelrollenlagern

Die Lagerung des Lenkkopfes mit Kegelrollenlagern bewirkt eine höhere Steifigkeit der Lagerung und damit eine verbesserte Stabilität des Motorrades beim Beschleunigen, Abbremsen und Einlenken.

Beim Abbremsen bewirkt die steifere Lagerung, dass die Kontaktfläche des Vorderrades zur Fahrbahn (Reifenlatsch) die Brems- und Lenkkräfte sauber übertragen kann. Bei herkömmlicher Lagerung kann es bei sportlicher Fahrweise und verschlissener oder falsch eingestellter Lenkkopflagerung zu Störungen in der Kontaktfläche des Reifens kommen, die einen Haftungsabriss und ggf. Sturz bewirken können.

Das Einlenkverhalten des Motorrades wird durch den Einsatz der Kegelrollenlagerung präziser. Beim Beschleunigen wird ein ggf. auftretendes Schlingern des Motorrades vermieden, welches durch eine „weiche“ Lenkkopflagerung ausgelöst werden kann.

Die Lagerung mit Kegelrollenlagern hat gegenüber der Lagerung mit Schrägkugellagern eine höhere Lebensdauer, da die Tragzahl der Kegelrollenlager erheblich höher als die der Schrägkugellager ist. Die höhere Steifigkeit der Kegelrollenlager kommt durch den Linienkontakt der Kegelrollen zur Lagerlaufbahn gegenüber dem Punktkontakt der Kugeln im Schrägkugellager zustande.

Die Lagerung des Lenkkopfes mit Kegelrollenlagern ist an älteren Motorrädern, sowie bei Rennmotorrädern Standard. Bei Motorrädern, deren Lenkkopflagerung mit Schrägkugellagern ausgeführt ist, wird der Umbau vorwiegend an Maschinen vorgenommen, die sportlich gefahren werden, jedoch kann unter Berücksichtigung der oben genannten Argumente auch ein Umbau für den Straßenbetrieb sinnvoll sein.

Hinweis zur Bestimmung der Maße der Lenkkopflager

Die Maße der serienmäßigen Lenkkopflager (Schräggugellager) lassen sich nur am komplett demontierten Lager ermitteln. Die Lagerhöhe lässt sich, wie in untenstehender Zeichnung beispielhaft dargestellt, nur am kompletten Lager bestimmen, indem die Höhe H über Innen- und Außenring gemessen wird. Die Höhe der einzelnen Lagerringe ist kleiner als die Gesamthöhe des Lagers.

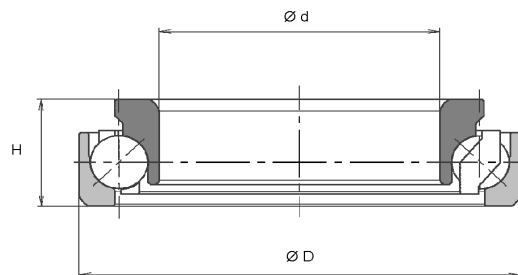

Abbildung:
Schräggugellager, Innendurchmesser d, Außendurchmesser D und Gesamthöhe H
